SWATERSOLUTION
KEEP CALM AND DRINK WATER

Mission

- ❖ Good companies will meet needs. Great companies will create markets. we try to create market and make you to create one for yourself. Our mission is to deliver the expertise, and earn profit for the customers..

Vision

- ❖ Our vision is to develop experience, design business which includes adding services to our business and our products. We are here to sale value, not price. Join hands with Swatersolution to swatersolution and finally to Swatersolution your life.
- ❖ We represent, server and latest and advance technology machineries to different industries/sectors and maximize value for our stakeholders by providing them the best products and services. We maintain their competitive advantage and also provide growth to the Water Treatment Industry.

WATER SOFTENING PLANT

Softening plant is designed to remove calcium and magnesium ions which cause the hardness of water. The hardness in raw water gets exchanged with sodium ions in the sodium based cationic resin bed, thus giving real soft water.

Softening plant is available in Manual as well as PLC based control system with Fully Automatic Option. It is available in FRP/MSRL models.

Softening plant is designed to cater to the requirement of scale Prevention of Utility / Plumbing Fixtures from Total Hardness. They are available in Bungalow / Institutional / Industrial Models.

DEMINERALIZATION SYSTEM (DM / MB PLANT)

Excel Demineralizers removes all cations and anions from water.

Excel Demineralizers consists of acid / alkali proof pressure vessel with internal firings and initial change of cation and anion exchanger. A set of regeneration equipment, hydraulic ejectors, acid and alkali tanks, conductivity meter provides pure Total dissolved salts free water which is required at power projects, pharmaceutical sector, Battery water, Electronic industry, Textile / Process water Applications.

PRESSURE BOOSTER SYSTEM (PRESSURE PUMP)

Excel Pressure boosting system consists of a high pressure pump with a controller and a pressure tank. The pumped water from high pressure pump comes in a tank and bladder, which is pressurized and by which the required pressure will be maintained within a whole system. Pump is very useful and must for Builders / Contractors, to reduce their construction cost. This pump is quite useful in all types of residential / commercial buildings, including high rise buildings, Luxurious flats and private bungalows.
